Tips & Tricks

Tips & Tricks to make the most out of MCP SuperAssistant.

1. **Turn off search mode** (chatgpt, perplexity) in AI chat interfaces for better tool call prompt experience and to prevent MCP SuperAssistant from getting derail.

2. **Turn on Reasoning mode** (chatgpt, perplexity, grok) in AI chat interfaces, which will help the AI to understand the context better and generate the correct tool calls.

3. Use newer high-end models as they are better at understanding the context and generating the correct tool calls.

4. Copy the MCP instructions prompt and paste it in the AI chat system prompt (Google AI Studio).

5. Mention the specific tools you want to use in your conversation.

6. Use the MCP Auto toggles to control the tool execution.
